PROFESSIONAL PROFILE

PhD-qualified Data Analytics and Information Management Specialist with 13+ years of experience supporting United Nations agencies, government institutions, and development partners through digital information systems, monitoring and evaluation, evidence generation, and results-based management. Combines expertise in machine learning, deep learning, explainable artificial intelligence (XAI), statistical modelling, and large-scale data analytics with extensive experience designing information management systems, digital dashboards, and evidence platforms for development programmes.

Demonstrated expertise in large-scale survey analytics, national data systems, data governance, real-time dashboarding, and programme performance monitoring across multi-stakeholder environments. Experienced in advising programme teams and senior management through data-driven insights aligned with UN strategic priorities, results frameworks, Sustainable Development Goals (SDGs), and reporting requirements.

Brings a unique combination of development-sector information management expertise and advanced computational analytics capability to support digital transformation, predictive analytics, and next-generation evidence systems for development programmes.

CORE COMPETENCIES

Information Management & Development Analytics

- Information Management Systems (MIS) & Digital Information Systems
- Results-Based Management (RBM) & Monitoring, Evaluation and Learning (MEL)
- Programme Performance Monitoring & Indicator Frameworks
- Data Governance, Quality Assurance & Validation
- Evidence Generation & Data-Driven Decision-Making
- Donor Reporting & Development Programme Support

Data Analytics & Artificial Intelligence

- Data Analytics & Statistical Modelling (Python, R, STATA, SPSS, SQL)
- Machine Learning, Deep Learning & Predictive Analytics, Explainable Artificial Intelligence (XAI)
- Large-Scale Survey Data Analytics, Quantitative Research & Statistical Methods

Visualization & Data Systems

- Power BI Dashboard Development, DAX & Data Modelling
- CAPI-Based Data Collection Systems (KoboToolbox, ODK, CSPro)
- GIS & Spatial Analysis (QGIS, ArcGIS)

Coordination & Capacity Development

- Stakeholder Coordination & Technical Advisory
- Capacity Building & Technical Training

PROFESSIONAL EXPERIENCE

Information Management Analyst

United Nations Population Fund (UNFPA), Islamabad, Pakistan

November 2025 – Present

Provide technical support and analytical leadership to programme teams through information management systems, data analytics, data quality assurance, and evidence products to strengthen programme monitoring, reporting, and strategic decision-making.

Key Contributions

- Develop and maintain digital information systems and Power BI dashboards to support programme monitoring, performance analysis, and strategic decision-making.
- Manage programme datasets, indicator tracking systems, and reporting workflows aligned with UNFPA corporate results frameworks and Sustainable Development Goals (SDGs).
- Provide technical leadership in information management, data analytics, digital monitoring systems, and evidence generation to strengthen programme performance, accountability, and results-based management.

- Design and operationalize Management Information Systems (MIS) aligned with organizational reporting standards and data governance requirements.
- Lead data quality assurance processes including validation, verification, harmonization, and triangulation of data from multiple implementing partners.
- Support CAPI-based data collection systems including KoboToolbox, ODK, and CSPro to improve data collection quality and efficiency.
- Produce analytical briefs, dashboards, statistical reports, and evidence products supporting donor reporting, programme planning, and management decisions.
- Deliver training and technical support on data systems, visualization tools, reporting standards, and information management practices.

Key Achievements

- Managed and analyzed programme datasets covering more than 160 districts nationwide.
- Developed dashboards supporting real-time programme monitoring and evidence-based .
- Improved reporting efficiency through optimization of data processing and visualization workflows.
- Strengthened harmonization of multi-partner data systems and reporting processes.

Data Processing Manager / Data Analyst

National Institute of Population Studies (NIPS), Islamabad

March 2023 – November 2025

Led data management, processing, and analytical activities for nationally representative surveys, transforming large-scale datasets into reliable evidence for policy development, research, and decision-making.

Key Contributions

- Managed end-to-end data processing workflows for large-scale national household surveys covering 130+ districts, including data cleaning, validation, coding, quality assurance, and preparation of analytical datasets.
- Designed and optimized data processing systems, databases, and workflows to improve data accuracy, consistency, and analytical readiness.
- Conducted statistical analysis and survey analytics using Python, R, STATA, and SPSS to generate insights from complex population-level datasets.
- Developed analytical outputs, statistical tables, reports, and visualization products supporting national publications, evidence generation, and policy recommendations.
- Established and applied data quality assurance frameworks, including validation checks, consistency assessments, and harmonization procedures across survey datasets.
- Coordinated technical teams and supported stakeholders through data interpretation, documentation, and capacity building.

Key Achievements

- Managed, processed, and analyzed large-scale survey datasets using advanced data quality assurance and statistical analysis methods to generate reliable evidence for national development planning and policy formulation.
- Improved data processing efficiency through workflow optimization, automation, and standardized quality assurance frameworks.
- Provided analytical inputs for nationally significant research outputs, survey reports, and evidence products supporting policy analysis and decision-making.

Data Processing Expert / Data Analyst

Innovative Development Strategies (IDS)

July 2018 – February 2023

- Designed and managed programme databases and digital information systems.
- Conducted statistical analysis supporting monitoring, evaluation, and programme performance assessment.
- Developed Power BI dashboards and GIS-based visualization products.
- Supported field data collection, quality assurance, and reporting processes.
- Produced analytical reports supporting evidence-based programme management.

MIS Expert

Innovative Development Strategies (IDS)

January 2016 – June 2018

- Managed Management Information Systems across multiple development projects.
- Led statistical analysis, reporting, and data quality activities.

- Developed reporting tools supporting programme implementation.
- Conducted technical training for field teams and partner organizations.

Assistant MIS

Innovative Development Strategies (IDS)

August 2012 – December 2015

- Supported information management systems, data processing, reporting, and survey implementation.

SELECTED ACHIEVEMENTS

- Designed and deployed Power BI dashboards integrating programme indicators across nationwide programmes, improving visibility of implementation progress and supporting timely management decisions.
- Designed digital monitoring systems supporting real-time programme performance monitoring.
- Strengthened data quality assurance through validation, harmonization, and governance frameworks.
- Produced analytical reports and evidence products supporting programme management and donor reporting.
- Built institutional capacity through training of more than 100 programme staff and field teams.

SELECTED PROGRAMME EXPERIENCE

- Global Adult Tobacco Survey (GATS) Pakistan 2024–25 (121 districts)
- National Drug Use Survey 2022–23 (131 districts)
- National Socio-Economic Registry (NSER) Operations Review (156 districts)
- BISP Verification Study (77 districts)
- Pakistan Household Skills Measurement Survey
- Pakistan Cotton Survey
- Pakistan Rural Household Survey

EDUCATION

PhD, Computer Science (Machine Learning & Data Science)

University of Engineering & Technology Taxila, Pakistan | 2020–2025

Research Focus: Deep Learning-Based Time Series Forecasting, Anomaly Detection, and Explainable Artificial Intelligence (XAI)

MS/MPhil, Computer Science (Machine Learning)

HITEC University Taxila, Pakistan | 2017–2020

TECHNICAL SKILLS

Advanced Analytics & AI

- Python (Pandas, NumPy, Scikit-learn), Machine Learning, Deep Learning, Explainable AI (XAI), Statistical Modelling

Data Analytics

- STATA, R, SPSS, SQL, Large-Scale Survey Analytics

Visualization

- Microsoft Power BI, DAX, Data Modelling

Survey Systems

- KoboToolbox, ODK, CSPro

GIS

- QGIS, ArcGIS

PUBLICATIONS

- An Efficient Mechanism for Time Series Forecasting and Anomaly Detection Using Explainable Artificial Intelligence, *Journal of Supercomputing* (2025)
- Time Series Forecasting and Anomaly Detection Using Deep Learning, *Computers & Chemical Engineering* (2023)
- Sentiment Analysis of Consumer Reviews Using Deep Learning, *Sustainability* (2022)
- Analysis of Different Clustering Algorithms for Accurate Knowledge Extraction from Popular Datasets (2020)
